Tank Inventory Status Report

Navigate to *Main Menu / Tank and Meter Inventory Menu / Report Menu / 1 Tank Inventory Status*.

This report is to be processed monthly.

The Tank Inventory Status report can be processed to show all tanks with the current inventory status or can be filtered to show a specific tank status such as *In* meaning it should be in the yard and available to be installed at a customer site. The report can export to video or Excel.

It is recommended that this report be processed for *In* tanks by Location on a monthly basis so the current inventory can be verified.
