

Changing Yards & Tanks for Routes in OptimizerPlus+

Last Modified on 05/06/2026 12:29 pm EDT

Path to the OptimizerPlus+

1. From the Energy Force main menu navigate to *Supervisor Menu / Maintenance Menu / Optimizer Maintenance Menu / Yard and Remote Tanks GPS*.
2. Select the *Location* changing.

Note: Only 1 Yard for each Route.

3. Press **Ctrl+M** for modify mode.
4. Select the *Route* in the right-side column and **Tab** to the *Yrd/Tank* column to make any needed changes.

Div	Route	Yrd/Tank
1	5	<input type="text"/>
1	7	T
1	8	T
1	99	T

5. Press **Ctrl+Q** to save the changes.

Note: If changes were made to any of the Route's Yards, either change the former yard to a tank or remove the route from that former location all together. Review each Location's Routes to make sure the routes are where to refill or start the shift from. Make sure all the changes made have been saved.
